PVC & PE PIPE BEDDING AND PROTECTION

Notes

1. Bedding material to be SAP 7.
2. Where the pipes are subject to traffic loads or the cover exceeds 2500, the manufacturers specification for bedding shall be noted on the drawings and strictly adhered to.
3. The refilling shall be carried out in several stages to achieve maximum compaction of the material without loading the pipeline.
4. Where the pipeline is to be subject to subsequent loading by construction traffic, provisions must be made in the design of the bedding and the choice of pipe class , to accommodate this event.
