# Financial Results for the Ten Months Ended 30 April 2013

This report summarises the Auckland Transport financial results for the ten months ended 30 April 2013.

### **Table of Contents**

- 1. Executive Summary
- 2. Statement of Financial Performance
  - a. Split by category (section 2a)
  - b. Net surplus/(deficit) waterfall (section 2b)
  - c. Split by activity (section 2c)
- 3. Capital expenditure results
  - a. Split by activity (section 3a)
  - b. Funding (section 3b)
- 4. Statement of Financial Position
  - a. Statement of financial position (section 4a)
  - b. Notes to the financial statements (section 4b)
- 5. Cash flow
  - a. Cash flow rolling forecast (section 5a)
  - b. Cash flow waterfall (section 5b)
- 6. Accounts Receivable/Payable (section 6)

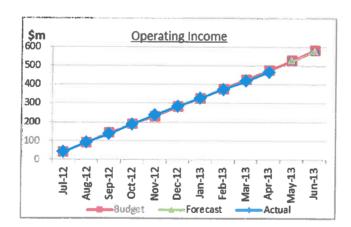

### **Executive Summary**

### Financial Results for the ten months ended 30 April 2013:

	Current month variance to Forecast	Year to date variance to Forecast \$million		to date	Year to date Actual \$million	Year to date Forecast \$million	Full year Forecast \$m	Full Year Budget \$million
Total operating income	5.4	(7.3)	Û	•	466.6	473.9	577.0	583.6
Total operating expenditure	(3.2)	7.8	Û		674.9	682.7	828.6	824.2
Surplus/(deficit) from operations	2.2	0.5	矿		(208.4)	(208.9)	(251.6)	(240.6)
Income for capital projects	(0.1)	3.4	Û		621.9	618.5	693.7	243.0
Net surplus/(deficit) before tax	2.0	3.9	矿		413.6	409.7	442.1	2.4
,								
Total capital expenditure	16.3	63.0	Û	<b>(</b>	888.1	951.1	1,103.5	719.8

Key to symbols used	Kev 1	o svm	bols	used:
---------------------	-------	-------	------	-------

⇔	: Within tolerable range	Û	: Above forecast, favourable variance
Û	: Below forecast, unfavourable variance		: Achieved forecast or better
Û	: Below forecast, favourable variance	0	: Monitoring, some action taken
矿	: Above forecast, unfavourable variance		: Action required

**Total operating income year to date** is \$7.3m net unfavourable to forecast. This is mainly due to:

 lower than forecast NZTA operational income \$12.5m due to lower expenditure than forecast (see below)

### partly offset by:

 higher Auckland Council operational funding of \$5.8m received in April but forecast to be received in June.

**Total operating expenditure year to date** is below forecast by net \$7.8m mainly due to:

- \$3.3m favourable variance for derevatives mainly due to unrealised interest rate swap gain of \$4.8m partly offset by higher than forecast realised interest rate swap loss of \$1.4m
- \$7.1m favourable variance on professional services

Partly offset by:

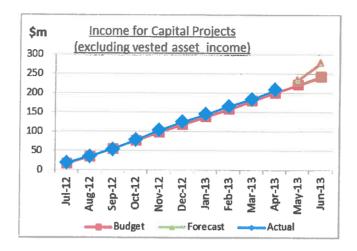

\$2.3m higher than forecast depreciation and amortisation expense.

**Net surplus before tax year to date** is \$413.6m. This is \$3.9m favourable to forecast. The surplus includes the vested asset income of \$414.4m which was not in the budget but is reflected in the forecast. Excluding the favourable variance for Income for capital projects of \$3.4m there is a favourable variance of \$0.5m. This \$0.5m variance includes a \$3.3m favourable variance from derivatives which are in place for capital programmes partly offset by \$2.3m higher than forecast depreciation and amortisation expense.

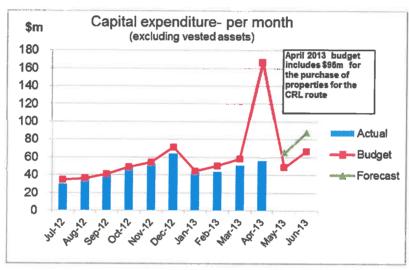

After allowing for these capital and non cash items the net operating result YTD is unfavourable by \$0.6m. Our review of the full year position, despite some positive and negative movements to forecast, indicate we will achieve a result in line with the funding provided. This will require continued diligence in managing both revenue and expenditure in the remaining months.

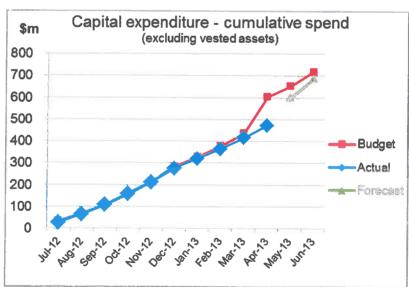

**Income for capital projects year to date** is higher than forecast by \$3.4m due to higher than forecast NZTA capital funding.

Capital expenditure, excluding vested assets, year to date was \$473.6m, which is \$63.0m lower than forecast due to less expenditure on new capital of \$47.2m, renewal capital of \$9.5m and EMU project \$6.3m.

The capital budget is separated into a number of funding pools which do not allow for underspend to be managed within the dynamic programming adopted by AT. The most significant item impacting this is the CRL project. The funding for this project comes from a specific council source and so has no dynamic programme impact.

When considered in the context of the dynamic pool of funds, more works have been carried out due to more funding from NZTA than was budgeted. It is expected that the funds available for the dynamic programming pool will be slightly underspent and bringing forward some capital items from 2013/14 is currently being assessed.

The **asset position** is sound with net assets of \$14.1 billion at the end of April and cash flow funding arrangements are in place to ensure all liabilities can be met.

Capital Expenditure:					
YTD Actual/Forecast variance	914	37,942	24,871	(902)	63,021

- 1. Reduced NZTA income for Public Transport due to lower than budgeted expenditure on Public Transport facilities.
- The favourable result for Public Transport of \$4.5m was due to lower than forecasted expenditure on Public Transport facilities \$6.0m, offset by additional depreciation of \$1.5m
- 3. Roading unfavourable expenditure variance of \$5.5m is mainly due to unbudgeted street maintenance costs transferred from Auckland Council. The intent is to minimise the impact of these through savings in other roading activities.
- 4. Other revenue includes \$5.8m additional operational funding from Auckland Council forecast to be received in June.
- 5. Other expenditure \$7.2m favourable variance includes \$3.3m for derivatives and \$3.9m lower than forecast costs for asset management and planning activities.

Notes: (Year to date)

- 1. \$29.8m favourable variance in public transport is mainly due to AIFS project (\$14.0m, delay), Manukau Transport Interchange project (\$3.1m, Mainzeal going into receivership), and CRL project (\$11.1m is the result of a delay in property purchases).
- (0.9m, piling being particularly hard now has finished), Westgate Pedestrian/Cycle Bridge (\$0.8m, delay in construction), and Albany Hwy upgrade (\$0.7m, \$17.8m favourable variance in roads is mainly due to AMETI project (\$7.8m, due to delay in construction), Taharoto-Wairau Stage 6 and 8 specific delay on Kristin School works).
  - \$0.7m unfavourable variance in others is mainly due to overspending on IT Programme (higher number of users than expected and new initiatives ന്
    - e.g. AIFS absorbed by IT).
- \$0.6m favourable variance in parking renewals due to spend on off-street AT grade and Manukau carparks and carpark building renewals (mainly Fanshawe Street) have been delayed.
  - \$1.9m favourable variance in public transport renewal is mainly due to \$1.0m underspend on rolling stock renewals, \$0.6m underspend on ferry terminal renewals, and \$0.2m underspend on Britomart Rail Station renewals. Ś
    - \$7.1m Road renewals under forecast relates mainly to expenditure in the Central and South areas for pavement rehabilitation works, as priority was given to Reconstruction projects. However, all rehabilitation projects will be delivered by June 2013.
- \$2.8 unfavourable variance in EMU Depot is due to some construction costs are ahead of schedule, there is no effect on overall programme. 7. \$9.1m underspend in EMU procurement is due to reschedule of manufacturing payment, there is no effect on overall programme. 8. \$2.8 unfavourable variance in EMU Depot is due to some construction posts are about of schedule than is no effect.

Actual

Actual

The carrying value of cash and cash equivalents approximates their fair value.

Auckland Transport operates a restricted bank account for Auckland Integrated Fares System (AIFS). This account is used for the deposit of unused stored value on AT HOP cards and is therefore considered restricted funds.

### 2 Trade and other receivables

(745)	(745)
121,594	107,132
7,199	(465)
7 100	•
23,528	25,663
72,801	65,391
15,300	13,934
2,766	2,609
•	15,300 72,801 23,528 7,199

The carrying value of debtors and other receivables approximates their fair value.

There is no concentration of credit risk with respect to receivables as there are a large number of customers.

The maximum exposure to credit risk at the reporting date is the carrying value of each class of receivable mentioned above.

The ageing profile of receivables at 30 April 2013 is detailed below:

	Gross	Impaired	Net
	\$000	\$000	\$000
Not past due	102,864	-	102,864
Past due 1 - 30 days	2	(S)	-
Past due 31 - 60 days	1,941	<b>:</b>	1,941
Past due 61 - 90 days	1,595	: <b>:</b> ::::::::::::::::::::::::::::::::::	1,595
Past due > 90 days	15,194	(745)	14,449
	121,594	(745)	120,849

All receivables greater than 30 days in age are considered to be past due.

The provision for impairment of receivables has been calculated on an individual basis. The provision is based on a review of significant debtor balances. Receivables are assessed as impaired due to significant financial difficulties being experienced by the debtor, and Auckland Transport management concluding that it is remote that the overdue amounts will be recovered.

Movements in the provision for impairment of receivables are as follows:	Actual \$000
At 1 July 2012	792
Additional provisions made	75
Provisions reversed	(122)
Receivables written-off	(122)
At 30 April 2013	_
74 66 7 pm 2010	745

## Section 4b - Notes to the Financial Statements As at 30 April 2013

As at 30 April 2013	Actual	Actua
	30 April 2013	31 March 2013
	\$000	\$000
Derivative financial instruments		
Current liability portion		
Forward foreign exchange contracts - cash flow hedges	14,833	11,091
Forward foreign exchange contracts - not hedge accounted	286	283
Current derivative financial instruments	15,119	11,374
Non-current liability portion		
Interest rate swaps - cash flow hedges	29,259	26,557
Forward foreign exchange contracts - cash flow hedges	31,369	27,375
Non-current derivative financial instruments	60,628	53,932

### Forward foreign exchange contracts

The fair values of forward foreign exchange contracts have been determined using a discounted cash flows valuation technique based on quoted market prices. The inputs into the valuation model are from independently sourced market parameters such as currency rates. Most market parameters are implied from forward foreign exchange contract prices.

Forward foreign exchange contracts - not hedge accounted

The notional principal amount of outstanding forward foreign exchange contracts that were not hedge accounted was NZD \$861k. The foreign currency principal amount was EUR 375k. The loss on their revaluation of \$286k has been recorded in the Statement of Financial Performance.

### Forward foreign exchange contracts - hedge accounted

The notional principal amount of outstanding forward foreign exchange contract cash flow hedges was NZD \$345m. The foreign currency principal amount was USD \$245m. These cash flow hedges have been accounted for as effective and the loss of \$46m on their revaluation has been transferred to the cash flow hedge reserve within equity.

### Interest rate swaps

The fair values of interest rate swaps have been determined by calculating the expected cash flows under the terms of the swaps and discounting these values to present value. The inputs into the valuation model are from independently sourced market parameters such as interest rate yield curves. Most market parameters are implied from instrument prices.

The notional principal amount of the outstanding interest rate swap contracts was \$377m. At 30 April 2013 the fixed interest rates of cash flow hedge interest rate swaps varied from 5.02% to 5.4%.

### 4 Trade and other payables

	133,368	149,008
Income in advance	2,951	2,397
Amounts due to related parties	12,980	13,797
Retentions	7,003	7,282
Accrued expenses	96,467	94,558
Creditors	13,967	30,974

Creditors and other payables are non-interest bearing and are normally settled on 20-day terms. Therefore, the carrying value of creditors and other payables approximates their fair value.

# Section 4b - Notes to the Financial Statements

- 1 This section relates to amounts owed by related parties (inter-company).
- 2 This is a debtor who paid AC in error. We are working with AC to rectify this problem.
- A number of invoices have been queried by the Debtors concerned and we are working with them and the relevant Departments in an effort to resolve these queries. The bulk of the outstanding amount is made up of 2 invoices totalling \$174k (\$85k 120+ days and \$88k current). Finance are in constant contact with the business in an effort to resolve these queries.
- 4 Property are currently working to resolve on-going issues around outstanding amounts relating to rental of cell sites. An amount of \$788,791 was impaired at 30 June as they were considered doubtful. This has been revised down to \$711k. An additional \$476k of unpaid invoices have been included here as they remain unpaid while the original issue is being resolved. This matter is receiving urgent attention by Property.
- 5 These are amounts which may be written off in the future. All amounts written off are approved by the CFO in accordance with accepted practice. A number of Debtors have been handed over to Baycorp for collection.
- 6 We have agreed payment terms with a few slow paying Debtors rather than handing them over to Baycorp.

  These are closely monitored to ensure that payments are received on agreed dates. A number of these were paid up during the last month.
- Lodged at Court relates to matters where AT is recovering damages from road accidents investigated by the
   Police. Many of the matters are being paid off at a nominal amount per week as instructed by the Courts.

### Infringement Overview

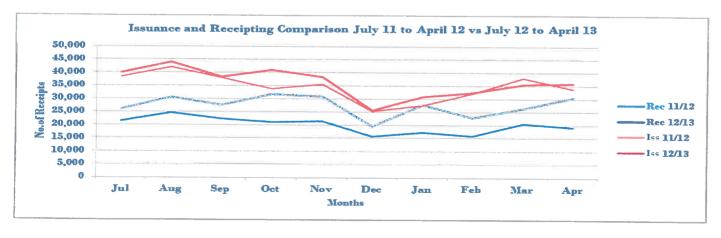

April receipts are 15.5% up on March with 20 receipting days in both months.

The overview above of customer payment channels has once again changed in April. Baycorp have again increased their collection value to 28% and received 26% of receipts volume, up from 15% in March. The AT Website in contrast, received 36% of the receipts volume in April compared with 47% in March, while collection value remained static. The number of customers making use of KiwiBank has dropped while customers paying via Internet Banking has increased. Council's FoH operations received 2% of volume and 4% of value.

The following graph clearly illustrates how effective the collection process has been over the past 10 months. This graph does not include any recoveries through MOJ. While the issuance for the same periods over the past 2 years have definitive trends (2 red lines), the collection process has clearly increased over the same period, with April's collections very close to issuance. Over the two periods shown, issuance has increased by 5% between 11/12 and 12/13 while collections have increased 37% from 11/12 to 12/13.

### Recommendation

It is recommended that the Auckland Transport Board receive the report.
